Federal Communications Commission  
Office of the Secretary

paul m dezarn (pdezarn@aol.com) writes:

Dear Commisioner Adelstein,

I would like to request that you would please vote in favor of SBC getting into long distance in Michigan. Even though I am an Ohio resident I am hoping that it will lay the ground work for long distance for SBC here in Ohio. It is sad to me that companys like MCI and AT&T have gained such an unfair advantage in telecom and invest basically zero dollars into phone plant and create no new jobs. I urge you to vote in favor of SBC in Michigan and when the time comes also for Ohio. Its time to level the long distance playing field and to truly give residential customers a choice. C-LECS do nothing but target business customers and the U-NEP has done nothing but have a negative effect on telecom as a whole, its also time to do away with U-NEP.

Respectfully,

Paul M. Dezarn
